

Sprint 3 Plan: Social Analytics

Final Revision 07/24/2018

Sprint time: 07/18/2018 - 07/24/2018

Goal: Create an app with signup capabilities that will output something about the user, given their twitter handle.

Template:

As a [user-type], I should be able to [some action], for the purpose of [some goal/functionality]

As a user, I should be able to see the information about my tweets in displayed on the website accompanied by an explanation.

--Add a histogram or bar chart of magnitude and positivity (5 points)

--Write a paragraph explaining the significance and relevance of magnitude and positivity (1 points)

--Display top 3 categories that best represent the user's tweets (3 points)

As a user, I should be able to store my twitter handle and not have to type it in every time I use the application

--Add box to accept handle and add twitter handle to DB (3 points)

--Pass twitter id from signup component to analysis component (3 points)

As a user, I should be able to see an analysis for one or all of my tweets. User tweets should be aggregated and categorized

--Add functionality to support requesting multiple tweets (3 points)

--Aggregate user data for requests with tweets > 1 (1 points)

--Display the analyzed tweets and the conclusion for user to see (1 points)
