

User Story List:

Slides (2 - 6) for Release Plan:

Project Release Plan (5 min)

- Brief outline of problem/opportunity
  - Users are generally unaware of the way their personal information on social media and how the data that they generate is used to create “manipulated” content.
- High level goals
  - Educate users on how their data is being collected
  - Tell a story using graphs, simulations, etc
  - Integrate various social media platforms

Project Release Plan - User Stories (5 min)

- Sprint 1 user stories each labeled with assoc. high-level goal
  - Integrate social media API endpoints, see what data we can extract 1.[twitter](#) 2.[instagram](#). [snap](#) or [fb](#) later.
  - Potentially have to web scrape
- Sprint 2 user stories each labeled with assoc. high-level goal
  - Create user profile based on collected data
  - Figure out how to present that data in a useful way through graphs/tables
- Sprint 3 user stories each labeled with assoc. high-level goal
  - User testing to refine interface
  - Make cross-platform analysis available to user
  - Bug squashing (continuous integration)

Project Release Plan - Architecture

- Describe in words or, better, with a diagram the overall structure/major components of your planned product.

Project Release Plan – Challenges/Risks

- Each member learning a social media api
- Combining multiple diverse datasets into one useful set(s) for a user
- 

Project Release Plan – Technologies

- HTML, CSS, Typescript, Javascript
- NodeJS, Npm, Github, Sourcetree
- PostgreSQL, Amazon Web Services
