

Install nodejs

```
$ sudo apt-get install -y nodejs npm  
$ sudo npm install n -g  
$ sudo n stable  
$ sudo ln -sf /usr/local/bin/node /usr/bin/node
```

****** app command is nodejs not node

Install express

```
$ sudo apt-get install express
```

Avoid install restriction

```
$ npm config set strict-ssl false  
$ npm install  
$ npm config set strict-ssl true
```

Install express and create project

```
$ npm init  
$ npm install express —save  
$ create app.js
```

Run server with nodejs

```
$ node app.js
```

Install gulp

```
$ npm install gulp —save  
$ npm install gulp -g
```

Run server with gulp (no need to restart)

```
$ gulp
```
