

Sprint 3 Report: Social Analytics

Final Revision 07/24/2018

Sprint time: 07/18/2018 - 07/24/2018

Things to stop doing:

- Working without communicating to team members (aside from Scrum meeting)

Actions to start doing:

- Check in with team members to avoid merge conflicts
- Integrate into the master branch more often.
- Write more specific comments for each commit.

Actions to keep doing:

- Meeting together to integrate completed tasks and components.
- Pair programming to eliminate individual blockers

Work completed:

User story 1: Analysis of data is completed and displayed on website . User story 2: completed but not integrate with analysis component. User is able to sign up and store their username, password, twitter handle to the AWS DB. User story 3: User story complete, user can see more than 1 tweet and see the aggregated analysis displayed on website.

Work Completion Rate:

3 user stories were completed over the course of a combined 54 ideal work hours. We average 3/7 user stories per 54/7 average ideal hours per day.
