

## **Sprint 1 Report: Social Analytics**

Final Revision 07/17/2018

Sprint time: 07/11/2018 - 07/17/2018

### Things to stop doing:

- Working before having an explicit sprint release plan

### Actions to start doing:

- Communicating to team members regularly
- Plan regular meeting time and location

### Actions to keep doing:

- Keep researching tools, packages, and frameworks (Vue, AWS, Gulp, Twit API)

### Work completed/not completed:

#### Completed:

- User can access the website deployed locally
- Twitter API backend setup, given a user id; we can request user tweets

#### Differed:

- Eliminated Instagram API from application project after carefully considering data consumption access

#### Not Completed:

- User's social media data not displayed on to localhost website
- User cannot presently receive information about the data they have published online
- User cannot submit social media identification for storage

Work Completion Rate: 2 user stories were completed, 1 was differed and 3 were not completed. We worked a combined 50 ideal work hours. We averaged 2/7 of a user story over the course of 50/7 combined ideal work hours per day.
